## PROFESSIONAL SUMMARY

Passionate and adaptable developer with a Bachelor's Degree in Computer Engineering and a Specialize in Information Security. enjoy building full-stack applications, especially using tools like React, Node.js, and MongoDB. comfortable working both independently and as part of a team, and always aim to write clean, secure, and well-documented code. also had hands-on experience with Linux systems, version control, and agile workflows.

## EXPERIENCE

### Software Engineering Intern | Sada Intellegence Solution | Hebron

Jul 2022 – Jul 2023

- Frontend Development: Built responsive and dynamic user interfaces using React.js, ensuring cross-browser compatibility and optimized performance.
- Backend Development: Developed robust server-side logic with Node.js and Express.js, creating RESTful APIs that integrated seamlessly with the frontend.
- Database Management: Implemented and managed NoSQL databases using MongoDB, ensuring efficient data storage, retrieval, and security.
- Agile Methodology: Actively participated in agile development practices, including sprint planning, daily stand-ups, and retrospectives to ensure timely delivery of projects.

### Data Science & Machine Learning Program | IBT Learning Solutions & GGateway

Jan 2026 – Apr 2026

- Learned core concepts of data science, machine learning, and AI workflows.
- Worked with data preprocessing, model training, evaluation, and predictive analysis techniques.
- Gained practical experience with Python libraries and machine learning fundamentals.

## TECHNICAL SKILLS

**Programming Languages** : Python, JavaScript, TypeScript, C++

**Web Development** : React.js, Express.js, Node.js, Tailwind CSS, Bootstrap

**Databases** : SQL, NoSQL (MongoDB, Redis, neo4j)

**AI & Machine Learning** : TensorFlow, Scikit-learn, Pandas, NumPy

**DevOps & Tools** : Git, Azure, Postman, Jira

**Methodologies** : Agile (Scrum)

## EDUCATION

### Master's Degree in Intelligent Systems and Data Science - Palestine Polytechnic University BS in Computer Engineering - Information Security at Palestine Polytechnic University

Sep 2025 – Present  
Sep 2020 – Jun 2025

## PROJECTS

### Student Accommodation (Security graduation project) | MERN Full Stack

Dec 2023 – Mar 2024

- Developed a full-stack student housing platform with a strong focus on data security.
- Implemented authentication, authorization, and secure user data handling practices.

### Diet-APP | React.js

Nov 2023

- Designed and developed a user-friendly diet tracking application using React.js
- enabling users to log meals, track calorie intake, and manage daily food entries efficiently.

### Smart Mirror(Graduation Project) | Python, Node.js

Jan 2025 - Jun 2025

- Built a smart mirror that shows time, weather, and calendar events.
- Added voice control using Google Speech Recognition using Python.
- Used AI to detect outfit colors and give clothing suggestions using Python.
- Integrated sensors for temperature, humidity, light, and motion
- Designed the UI with MagicMirror Framwork using JavaScript

## AWARDS AND CERTIFICATIONS

### AI-Hackathon U-TEACH LEAGUE with MICROSOFT and FINOMENA | TeamWork

Jun 2024

- Implemented a website chatbot for Jawwal company using LangChain and Azure OpenAI.
- Collaborated with a university team, and after the elimination stage, the team was restructured into 6 members; we achieved second place as a support team.

### Quantum Computing Program | Participant

2025

- Participated in a quantum computing program in Palestine, exploring the fundamentals of quantum computing and its potential applications in healthcare.
- Proposed a concept for using quantum computing to assist in blood separation by analyzing the characteristics of different blood components and exploring the potential use of quantum algorithms for improved classification and separation.
- Presented and discussed the idea with participants and explored how emerging quantum technologies could contribute to solving real-world healthcare challenges.
